

Dear,

Today's message is short, sweet but very exciting!

I'm looking for testers - specifically I am looking for readers who would be interested in trying out an exciting, new and very simple to use Forex trading system . . .

You can apply to become a beta tester free [here](#)

I hate to admit it, but I've been a bit naughty . . .

You see, last week I allowed someone to sneak a peek at an early draft of this new system. Days later they emailed me to say they had bagged 42.8 points in their first morning of trading the system - how's that for a promising start!

Ok, one tester trading for one day is meaningless. And that's why I'm relieved I can finally open up the doors for applicants to become a beta tester for ATM-FX.

To put your name on the list just go [here](#)

At last I can also reveal that the brains behind ATM-FX is none other than Keith Cotterill, creator of the hugely popular Ultimate FX Predictor. Now if you are a former student of Keith's, then I am sure you'll need no persuading that this could be a very big deal.

We knew that some people were unable to get involved due to the price of The Ultimate FX Predictor. When you realise you get lifetime support, ongoing free software updates and the software itself, this is a considered purchase, but one I truly believe is great value. Even more so when you appreciate that this is a tool which could help replace your main income source.

However, we realised that there were people desperate to get their hands on a proven FX system but at a more comfortable investment. What's more we knew that not everyone wanted to become a full time trader - many people loved the idea of trading for fun and making a decent part-time income.

And that's why I asked Keith to come up with an entry level FX trading system that was simple to use, could deliver regular profits and could be priced at a point that would be attractive to everyone.

Anyhow, after 6 months of development, Keith has just delivered the final draft and it is now ready for real live testing. Of course, we have tested it ourselves, but the proof for me must come from those who are totally unbiased.

So do you fancy giving it a try?

If you are selected I will send you a free copy of ATM-FX, including the manual and videos. I'll also
